

# Data Week Leipzig

June 10<sup>th</sup>-13<sup>th</sup>, 2025

Call for Participation

## LSWT2025

13th Leipzig Semantic Web Day

<https://2025.dataweek.de/>

Dear colleagues,

The **13th Leipzig Semantic Web Day** (#LSWT2025) will once again be held in conjunction with the Data Week Leipzig on **June 12, 2025**, taking place in the heart of Leipzig.

Since 2009, LSWT has provided scientists, businesses, and organizations with a platform to exchange ideas on topics related to semantic technology. During LSWT2025, we will highlight the latest developments and trends in semantic technologies and data. The **focus topics** for this year include:

- Current challenges in the application of Large Language Models
- Semantic technologies and AI for Industry and Science
- Emerging Data Products
- Data Competence and Security, including Cybersecurity in Data Management
- Knowledge Graph Use cases and Sustainability
- FAIR Data and Data Catalogs
- Networked Society

These topics will be presented in lectures by experts from both industry and academia. If you are interested in participating, we invite you to present your current work in a 15-minute talk. Presentations will be held in English. We particularly welcome contributions from women in the field of Data Science.

We look forward to your contributions to make this event a success!

**Please submit your presentation ideas by February 15, 2025**, to [lswt@eccenca.com](mailto:lswt@eccenca.com).

If you have any further questions, feel free to contact us.

We look forward to meeting you in Leipzig.

Best regards,

**LSWT Organizing Team**
